instruction to switch

(number of units) from **LPP** to **LPP**

in the «J. Safra Sarasin Investment Foundation», Basel, at the acquisition price set on the subsequent valuation date. For the portion of assets invested in rights, there is no entitlement to a minimum interest payment or capital preservation.

Your risk profile

The investment group’s strategic equities quota allows you to select an investment strategy at any time that matches your risk profile (risk capacity and risk tolerance).

Risk capacity is an investor’s ability to weather fluctuations in value and withstand losses on his investments without falling into financial hardship. The less an investor relies on his invested capital to meet his obligations, the greater his risk capacity is.

Risk tolerance refers to the extent to which an investor’s own willingness to tolerate fluctuations in value – profit/loss – and take risks in exchange for a potentially higher return.

If there are major changes to your personal circumstances (advancing age, retirement, income, marital status, inheritance, etc.) and you have to readjust your current investment strategy, simply switch to the strategy that suits you best.

If your investment decision deviates from your risk profile and you opt for a different investment strategy, you will have to bear the associated risks yourself.

Supplementary information on «LPP Equities 80 – non-BVV2-compliant»

The equity exposure and fluctuations in value (profit/loss) for this new investment strategy are much higher than for conventional pension products. That is why the investment group is suited to investors with a corresponding risk profile and/or long investment horizon.

I have noted the contents of the Supplementary Regulations for J. Safra Sarasin Pillar 3a Foundation governing securities investments and accept them in full. I hereby authorise J. Safra Sarasin Pillar 3a Foundation, to notify any intermediary involved in settling the transaction with details of the Pillar 3a account/securities investment.
